EDUCATION

Bachelor of Engineering in Information Science & Engineering July 2023 - July 2027 (Expected)
Bahubali College of Engineering, Shravanabelagola, Hassan | VTU, Belagavi CGPA: 8.29

PERSONAL PROJECTS

Visual Voices: AI-Driven Lip Reading Using Deep Learning

Team Project — VTU Mini Project, V Sem | Python, TensorFlow, OpenCV, CNN, GRU, HTML/CSS/JS

- Coded the CNN-GRU deep learning pipeline to predict spoken words from silent lip-movement videos, including video preprocessing (frame extraction, mouth detection, normalization) using OpenCV
- Implemented the web interface for video upload and real-time text prediction display
- Prepared and presented the project presentation covering system design, methodology, and results

RF-Based Smart Traffic Signal Control for Ambulance Clearance

In Progress — Project Lead | Arduino Mega 2560, Embedded C/C++, RF Transmitter-Receiver (433 MHz)

- Led a 4-member team to build an RF-based system that auto-detects ambulances and switches the corresponding traffic lane to green while others turn red
- Directed system architecture, hardware setup (RF modules, LEDs, LCD), and firmware development for real-time signal control
- Managed project timeline and task delegation across phases; hardware integration and testing ongoing

INTERNSHIPS

CodeAlpha — Python Development Intern (Remote)

1 Month

- **Task Automation System:** Developed a Python-based automation tool to streamline file handling and data extraction processes
- **Rule-Based Chatbot:** Built an interactive chatbot using conditional logic to handle user queries
- **Stock Portfolio Tracker:** Designed a tool to calculate, monitor, and manage investment performance
- **Hangman Game:** Created a command-line word-guessing game with interactive user logic

Oasis Infobyte — Python Development Intern (Remote)

1 Month

- **Random Password Generator:** Developed a Python-based password generator with customizable length and character sets, implementing random password generation and input validation
- **BMI Calculator:** Built a Python-based BMI calculator that accepts user input, calculates BMI using standard formulas, and classifies results into health categories
- **Voice Assistant:** Developed a Python voice assistant using Speech Recognition, Text-to-Speech, and web automation to process voice commands and perform basic tasks

TECHNICAL SKILLS AND INTERESTS

Languages: Python, Java, HTML, CSS

Tools & Technologies: Git, GitHub, Docker, VS Code, PyCharm, Jupyter Notebook

Frameworks: TensorFlow, OpenCV, FastAPI, Flask, Spring, Rag, CI/CD

Areas of Interest: DevOps, Cloud, Software Development & Testing, Web Design

Operating Systems: Windows, Linux/Ubuntu

CERTIFICATIONS

- Python for Beginners — Simplilearn (Feb 18th – Apr 29th), 2026
- Python Automation Internship — CodeAlpha (mar 7th – Apr 10th), 2026
- AI DevOps Analyst — Skill India (June 27th), 2026
- Hackathon 'C3' — Certificate of Participation, Bahubali College of Engineering, 2026

ACHIEVEMENTS

- HackerRank — Global Rank 1,119,947 | Points: 125/220

ADDITIONAL INFORMATION

Soft Skills: Communication, Teamwork, Problem Solving, Leadership, Passion for Learning

Languages Known: Kannada, English, Hindi
